

**Spring 2020**  
**Willow Class**

**Maths**

This term we will begin by focusing on the formal written methods for multiplication and division. After that, we will expand our knowledge of measurement by calculating length, perimeter and area. After half term, we will study fractions and decimals.

**English**

Our writing will be inspired by our topic this term which is Rainforests. We will be learning how to organise our writing into paragraphs and use sub-headings when writing non-chronological reports. We will produce and present debates concerning deforestation and write persuasive letters in response to the affect deforestation is having on our rainforests.

**Geography**

In Geography, we will identify countries and continents on a world map before discovering which of these contain the rainforests of the world. We will discuss the rainforest climate and study South America and the Amazon rainforest in detail.

**RE**

This term we will be learning about the Trinity and why Jesus is inspiring to some people. We will also look at the Christian creation story and compare this to the Mayan creation story.

**Science**

During this term, we will study plants. We will identify and label the different parts of a plant and their functions. We will discuss what is required for a plant to grow as well as explain the life cycle of a plant.

**Computing**

We will be creating our own animations using 2Animate on Purplemash, learning how to use search engines safely and effectively as well as writing for different audiences.

**PE**

**Monday** –Gymnastics/Tri-golf  
**Friday** - Netball /Tennis
